440 pages, line figures, 234mm x 156mm

Series: Oxford Psychology Series

[Search for titles in the same series](#)

- New edition of a classic psychology text
- Presents a thorough review of the research into anxiety
- 1st edition critically acclaimed
- Anxiety affects approximately 20% of the general population

Description

The *Neuropsychology of Anxiety* first appeared in 1982 as the first volume in the Oxford Psychology Series, and quickly established itself as the definitive work on the subject. In the many years since the 1st edition, significant advances have been made in the study of anxiety, and much evidence obtained supporting the original theory. The new edition has been extensively revised, considering these recent advances, and laying down the foundations for future research.

Contents/contributors
