Development of the Prefrontal Cortex

Evolution, Neurobiology, and Behavior

Edited by Norman A. Krasnegor, Ph.D., G. Reid Lyon, Ph.D., & Patricia S. Goldman-Rakic, Ph.D.

 [e-mail a colleague](#)

In this comprehensive overview, notable investigators in the fields of neuroscience and behavior combine forces to examine research findings concerning the prefrontal cortex. The volume explores evolutionary issues; brain-behavior relationships; and the neurobiology, neuropsychology, and neuropathology of this important brain region.

Analyzing relevant primate and human research studies, the authors advance understanding of prefrontal cortex growth, structure, and function as it relates to children's development and behavior. This scholarly reference facilitates the work of psychologists, neuropsychologists, neurobiologists, pediatric neurologists, speech-language pathologists, researchers in learning disabilities, and students of developmental psychology, neuroscience, neuropsychology, and neurology.

Table of Contents

Introduction

Norman A. Krasnegor

Section I: Evolution and Neurobiology

1. Evolution of Prefrontal Cortex
Harry J. Jerison
2. Synaptic Substrate of Cognitive Development: Life-Span Analysis of Synaptogenesis in the Prefrontal Cortex of the Nonhuman Primate
Patricia S. Goldman-Rakic, Jean-Pierre Bourgeois, and

ORDERING INFO

Pasko Rakic

3. Organization and Development of Callosal Connectivity in Prefrontal Cortex
Michael L. Schwartz
4. Developmental Anatomy of Prefrontal Cortex
Peter Huttenlocher and Arun S. Dabholkar
5. Human Frontal Lobe Development: A Theory of Cyclical Cortical Reorganization
Robert W. Thatcher

Section II: Brain-Behavior

6. Competence, Cortex, and Primate Models: A Comparative Primate Perspective
Duane M. Rumbaugh
7. Language and the Prefrontal Cortex
Christiana M. Leonard
8. Development of Neuronal Activity in Cortical Regions Underlying Visual Recognition in Monkeys
Hillary R. Rodman and Kristy L. Nace
9. Frontal and Attentional Mechanisms Regulating Distress Experience and Expression During Infancy
Catherine Harman and Nathan A. Fox

Section III: Neuropsychology and Neuropathology of Prefrontal Cortex

10. Corticolimbic Circuitry and the Development of Psychopathology During Childhood and Adolescence
Francine M. Benes
11. Frontal Lobe Dysfunction Following Closed Head Injury in Children: Findings from Neuropsychology and Brain Imaging
Randall S. Scheibel and Harvey S. Levin
12. Dimensions of Executive Functions in Normal and Abnormal Development
Bruce F. Pennington
13. Prefrontal-Subcortical Circuits in Developmental Disorders
Martha Bridge Denckla and Allan L. Reiss
14. Cognitive and Social Development in Children with Prefrontal Cortex Lesions
Paul J. Eslinger, Kathleen R. Biddle, and Lynne M. Grattan
15. Sexually Dimorphic Brain-Behavior Development: A Comparative Perspective
William H. Overman, Jocelyne Bachevalier, Elena

Schuhmann, and Patricia McDonough-Ryan

16. The Work in Working Memory: Implications for Development
Karl H. Pribram
